

VECTRA^{H1}

3D. Anywhere.

IMAGING EXCELLENCE FROM
 **CANFIELD**

Communicate the possibilities.

Engage in a streamlined, persuasive consultation as you view the three-dimensional image from any angle, zoom in for a closer look, superimpose the simulation over the pre-op, compare side-by-side, or fade between the two.

W

ith its 3D assessment and simulation tools, Face Sculptor® makes it easy to communicate both surgical and non-surgical procedures — to **sculpt the dream** — on a three-dimensional image of your patient.

FACE sculptor®

- ✓ assessment
- ✓ automated measurements
- ✓ rhinoplasty
- ✓ chin augmentation
- ✓ injectables
- ✓ lifts
- ✓ facial contouring
- ✓ skin resurfacing

Show your patients the exciting possibilities of their anticipated aesthetic procedures.

Assessment tools to educate patients about their options, explain limitations, and set appropriate expectations. This can make all the difference in patient satisfaction.

Gray mode reveals contours, presenting opportunities for corrective procedures.

Canfield's proprietary RBX® technology separates the unique color signatures of Red and Brown skin components for unequalled visualization of skin conditions.

Automatic volume difference measurement with one click.

Visualize the degree of contour change with a color distance map.

Automated measurements, some only possible with 3D technology, help your patients understand their current condition.

Communicate the complete plan.

Visualize your patient's hopes and expectations. Quickly arrive at a shared understanding of objectives.

"The new dynamic in facial plastic surgery is facial contouring, and nothing demonstrates this better than VECTRA 3D. Whether I'm using fillers or making large structural changes, VECTRA's consultation tools offer the perfect imaging solution for my practice."

—Steven Pearlman, MD, FACS
New York, New York

"Rhinoplasty patients often cannot name the part of the nose that they don't like. With VECTRA 3D we speak the same language. I can take all the sliders and move them any way I want, and they say, 'Yes, that's what I like!'"

—Marc J. Salzman, MD, FACS
Salzman Institute of Cosmetic Surgery
Louisville, Kentucky

Close more complementary procedures.

Demonstrate the difference between the likely outcome with only one or multiple procedures. With Face Sculptor you can explore the possibilities and help your patient decide on the best possible treatment plan.

Print the dream.

When you're finished, click the optional Print button to select what you wish to show on the printed report, including your practice information and selectable 2D views of pre-op and/or simulation.

Differentiate your practice. Wow your patients!

Sculptor's state-of-the-art consultations drive greater media exposure and patient referrals.

Communicate the possibilities.

Use your patient's own image to explore possible outcomes.

Close more complementary procedures.

Show your patient the effect of combining procedures such as rhinoplasty with chin augmentation or cheek augmentation with neck liposuction.

Increase patient satisfaction.

Visualize your patient's hopes and expectations. Quickly arrive at a shared understanding of treatment objectives.

VECTRA^{H1}

delivers clinical-quality
3D imaging to any practice.

*Integrated flash and
converging ranging lights
for fast, reproducible
imaging every time.*

*Automated stitching of three facial captures
into one 3D image with VECTRA software.*

- precision optics for high-resolution 3D images
- simple, intuitive image capture
- lightweight and easy to handle

*Easily transport the VECTRA H1
packed securely in its
custom soft carrying case.*
