

IntelliStudio®

Standardized studio quality
photos made simple

- ✓ Capture templates streamline acquisition of consistent and repeatable image sets.
- ✓ Software controls zoom, lighting, and camera orientation and guides patient poses.
- ✓ MatchPose® ghosts pre-op to live image to assure follow-up images are perfectly registered.

Any user can capture repeatable,
perfectly registered before and after
images, every time.

IMAGING EXCELLENCE FROM

 **CANFIELD**

IntelliStudio®

Studio-quality LED lighting is calibrated and balanced for skin imaging.

Studio lighting reveals skin features while maintaining aesthetics and reducing shadows.

Cross-polarized lighting eliminates surface reflection for better visualization of subsurface information.

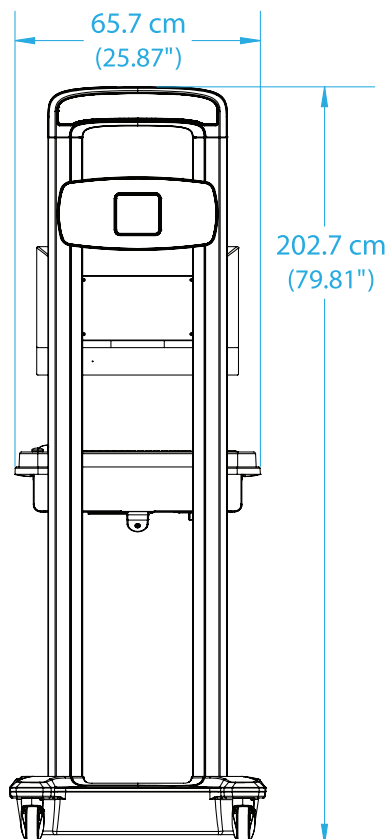

Studio lighting

Cross-polarized

Standardized templates control camera settings and guide patient poses.

Motorized programmable lift ensures repeatable camera positions and lighting.

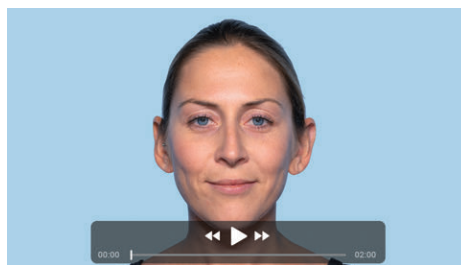

Automated sequencing guides the user through captures—no special photography skills needed.

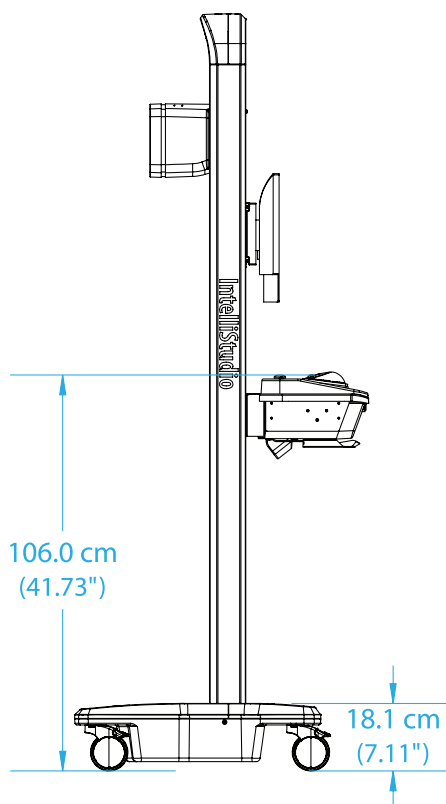

MatchPose® overlay ensures registered before-and-after images.

Programmable zoom maximizes image resolution for face images and other smaller field captures.

Video with LED lighting and record, playback and zoom capabilities.

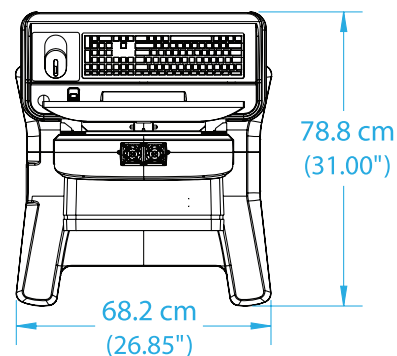

Auto facial recognition algorithms ensure that the patient's face is automatically recognized, setting the camera height for quick and repeatable patient positioning.

IntelliStage®

IntelliStage automated turntable rotates the patient safely and comfortably throughout a series of image captures. IntelliStudio's integrated video capability combined with IntelliStage enables smooth circumferential video for before and after documentation.

Minimum system space requirements

1.68 m (5.5 ft.) x 2.62 m (8.6 ft.) with minimum ceiling height of 2.3 m (7.5 ft.)

IntelliStudio system weight: 88 kg (194 lb)
