360° and 180° whole body imaging systems
The DermaGraphix Dashboard organizes patient images for optimal review and assessment.

- View all captures of the same lesion in a single column; all lesions captured during the same visit in a single row.
- Filter, search, and sort images by selectable attribute.
- Secure HL7 compatible image management system.

Tag dermoscopic images to overview photos for efficient exams and accurate follow-ups.

- Wireless tagging with VEOS DS3 dermatoscope or USB tethering with VEOS SLR.
- All images associated with a lesion are linked to a unique number and tagged to the 3D body map.
- Selectable tagging routines provided to accommodate workflow preferences.
- All photos, notes and attributes associated with a lesion are available for instant review and comparison.

Easy surveillance with side-by-side comparison of overview and dermoscopic images.

- Body maps are linked to ensure the same anatomical site is visible in both views.
- Compare all image capture and lighting modalities side-by-side.
- Full screen close-up image review with zoom capability.
Accurate body surface area measurements.

- Psoriasis
- Vitiligo
- Plastic and reconstructive surgery
- Burn management
- Lymphedema management
- Neurofibromatosis

Additional applications

Accurate body surface area measurements.

The DermaGraphix Loupe Tool provides additional viewing modalities for enhanced lesion assessment.

Viewing modalities include:
- High resolution 3D image (shown)
- Geometry (gray mode)
- High resolution source

The DermaGraphix Loupe Tool is a powerful tool that enables users to check for changes between office visits. It features:
- Simple, intuitive user interface.
- Includes both overview and close-up images.
- Data stored on a secure, password-protected and encrypted USB flash drive.

Compare lesions anywhere on the skin surface without perspective distortion.

BSA: 16,458 cm²
Involved area: 2668 cm²
16.2%

3D cross-polarized lighting (patent pending) clearly reveals pigmentation variation.

Powerful search capability

- Customizable attributes for patients, lesions and images.
- Search by doctor, procedure, diagnosis, date ranges and other attributes.
- Audit trail and stratified rights capable.
VEOS® DS3
Canfield’s exclusive optics and lighting combined with wireless image capture.
- Sequentially capture cross-polarized and non-polarized images
- Capture both clinical (overview) and dermoscopy photos
- Contact and non-contact imaging
- 10x magnification
- Integrated iPod® Touch for touch screen operation

VEOS SLR captures consistent, reproducible dermoscopic images.
- 22mm field of view and high resolution capture.
- Sequentially capture cross-polarized and non-polarized images in either contact or non-contact modes.

VISIOMED™ D200evo
A high-resolution digital dermatoscope with quality, flexibility and efficiency all in a compact, hand-held system.
- 15–200x magnification
- Polarized and non-polarized lighting
- Tag and capture using the touch screen and keypad for computer-free dermoscopy photos
- Capture both clinical (overview) and dermoscopy photos

Canfield dermatoscopes are compatible with DermaGraphix software so you can easily link each close up image to its corresponding tagged lesion in the 3D body map.
