REVOLUTIONIZE YOUR CONSULTATIONS
Repeatable facial imaging enables you to track treatment progress and outcomes effectively over time.

IntelliFlash®, cross-polarized, and UV lighting modes are used to record and measure surface and subsurface skin conditions, all with one quick, automated series of flashes.

Capture-only mode enables fast, repeatable facial imaging for photo documentation without pausing to process the images. Analysis may be performed later, if desired.

Skin type detection is automatic for streamlined image processing and feature analysis.

Multi-zone masking automatically identifies the critical region for each skin feature and VISIA instantly analyzes Spots, Wrinkles, Texture, Pores, UV Spots, Brown Spots, Red Areas, and Porphyrins.

“Engage clients”

“We’ve been using VISIA in our practice since 2004, and I can’t imagine skin care consults without one. Our new 7th Generation VISIA takes patient education and communication to a whole new level.”

—Eliot Battle, M.D.
Cultura Dermatology & Laser Center
The visual impact of VISIA Skin Analysis combined with clear targeted recommendations from VISIA’s built-in, customizable Product & Treatment Library will enable your staff to sell rejuvenation and skin care treatments more effectively.

Your client can take it all home with ViewMyConsult web portal and personalized printed reports.

**Patented Comparison To Norms** analysis uses the world’s largest skin feature database to grade your client’s skin relative to others of the same age and skin type.

**RBX® Technology** separates the unique color signatures of Red and Brown skin components for visualization of conditions such as spider veins, hyperpigmentation, rosacea, and acne.

**UV photography** provides data for sun damage assessment and analysis, including UV fluorescence imaging to reveal porphyrins.

**Aging simulation** communicates the benefits of anti-aging treatments.

**Compare** results for any combination of views, features or time points.

**TruSkin Age®** uses VISIA’s analysis to assess your client’s overall skin condition and age, providing a revolutionary new metric to guide the selection of skin care products and treatment options.

"VISIA has transformed our aesthetic consultations. There is no better way to communicate with a patient about their skin condition and the treatment options."

—Robert A. Weiss, M.D.
The Maryland Laser, Skin and Vein Institute
Customize your VISIA consultations with these powerful options

ViewMyConsult® web portal helps you stay connected to your clients as they consider the possibilities of aesthetic procedures. By accessing a secure, password-protected web portal, clients can view their pictures, treatment recommendations, and treatment progress in the privacy of their own home.

A feature-rich dashboard displays clear analytics on client visits, page views, VISIA system usage, recommendations, and more.

ViewMyConsult is included with a current VISIA Canfield Care Service Agreement.

VISIA consultation app for iPad® allows access to your networked database of client images and data from anywhere in the practice, combining full-featured aesthetic consultations, enhanced product recommendations selection, and multi-language support with the convenience of a tablet.

Canfield Care® Service Agreement provides unlimited technical support, hardware warranty, training webinars, software upgrades and ViewMyConsult patient portal access. One year of Canfield Care is included with every VISIA at no extra cost.

Additional seat licenses. With VISIA installed on your local area network, access client sessions from as many work stations as you need—perfect for any practice with multiple consultation rooms.

Mirror® integration provides a direct interface with Canfield’s Mirror medical imaging software (available separately), to help communicate the benefits of resurfacing and injectables. Mirror’s medical image management keeps all of a patient’s images, from any camera, instantly accessible, all in one screen.
