PRIMOS^{CR}

micron-level 3D resolution

- **Stereo and fringe correlation**
- **Substantiate claims with objective data**
- **Proven image analysis methods**

Canfield stereotactic face device

*Industrial-quality rugged construction*

IMAGING EXCELLENCE FROM

CANFIELD
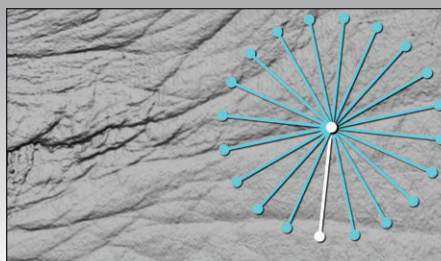

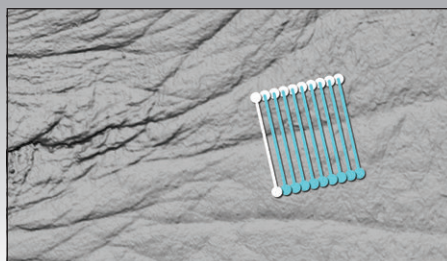

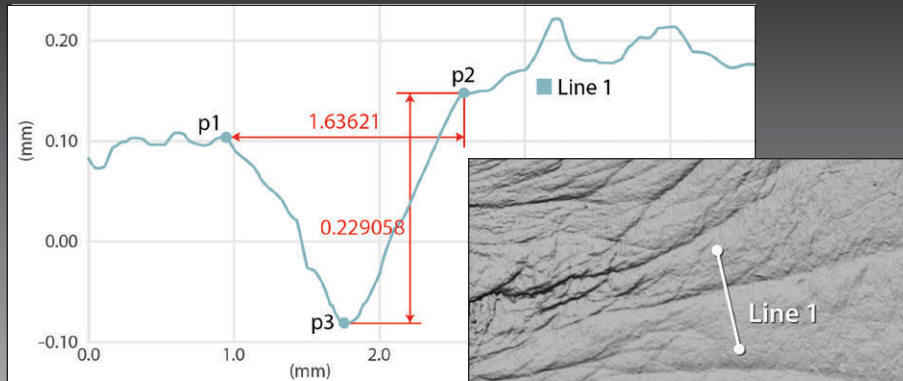

PRIMOS^{CR}

High resolution 3D images
for precise measurement of:

- fine lines
- lesions
- wrinkles
- wounds
- crow's feet
- scars
- skin texture

*Quickly quantify microstructure of the skin with adjustable depth and volume measurement tools. Automatically match baseline analysis with follow-up captures.*

Fast capture and analysis with VECTRA® software

- *Live capture*
- *MatchPose® overlay*
- *Perfect alignment every time*

- *Automated organization*
- *Immediate review*

PRIMOS-CR	*Field of view:* 45 x 30 x 25 mm	*X, Y Resolution:* adjustable between 20 and 100 μm	*Z Resolution:* up to 2 μm
