3D. Anywhere.
With its 3D assessment and simulation tools, Face Sculptor® makes it easy to communicate both surgical and non-surgical procedures — to sculpt the dream — enhancing your aesthetic consultations.

Differentiate your practice. Wow your patients! Sculptor’s state-of-the-art consultations drive greater media exposure and patient referrals.

Communicate the possibilities. Use your patient’s own image to explore possible outcomes.

Close more complementary procedures. Show your patient the effect of combining procedures such as rhinoplasty with chin augmentation or cheek augmentation with neck liposuction.

Increase patient satisfaction. Visualize your patient’s hopes and expectations. Quickly arrive at a shared understanding of treatment objectives.
**Assessment tools** to educate patients about their options, explain limitations, and set appropriate expectations. This can make all the difference in patient satisfaction.

*Gray mode reveals contours, presenting opportunities for corrective procedures.*

*Canfield’s proprietary RBX® technology separates the unique color signatures of Red and Brown skin components for unequalled visualization of skin conditions.*

*Automatic volume difference measurement with one click. Visualize the degree of contour change with a color distance map.*

*Automated measurements, some only possible with 3D technology, help your patients understand their current condition.*

*Close more complementary procedures.*

*“The new dynamic in facial plastic surgery is facial contouring, and nothing demonstrates this better than VECTRA 3D. Whether I’m using fillers or making large structural changes, VECTRA’s consultation tools offer the perfect imaging solution for my practice.”*

—Steven Pearlman, MD, FACS
New York, New York

*Deliver the dream.*

*ViewMyConsult® web portal helps you stay connected to your patients as they consider the possibilities of aesthetic procedures. By accessing a secure, password-protected web portal, patients can view their 3D pictures in the privacy of their own home.*

*Your patient can take it all home with ViewMyConsult web portal and personalized printed reports.*

*Automated Markerless Tracking* provides a dynamic assessment of skin surface changes. Skin surfaces are automatically aligned, tracked and mapped. Vector arrows provide a precise indication of the direction and magnitude of skin movement, which is ideal for encouraging future treatments. Physician review of outcomes helps refine treatment techniques.

*3D SOLUTIONS · FACIAL IMAGING & ANALYSIS · IMAGING SOFTWARE · PHOTOGRAPHY · RESEARCH SYSTEMS & SERVICES · TRAINING*
VECTRA H1 delivers clinical-quality 3D imaging to any practice.

Automated stitching of three facial captures into one 3D image with VECTRA software.

Integrated flash and converging ranging lights for fast, reproducible imaging every time.

- precision optics for high-resolution 3D images
- simple, intuitive image capture
- lightweight and easy to handle

Easily transport the VECTRA H1 packed securely in its custom soft carrying case.
